

4 If you don't use this product, turn off the power of the remote controller, so as to prolong the lifetime of the batteries.

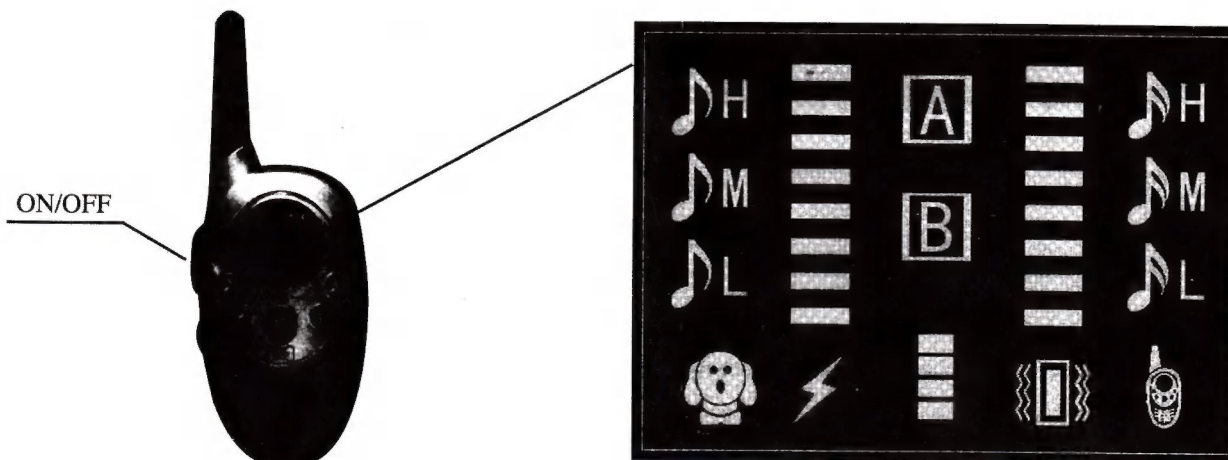

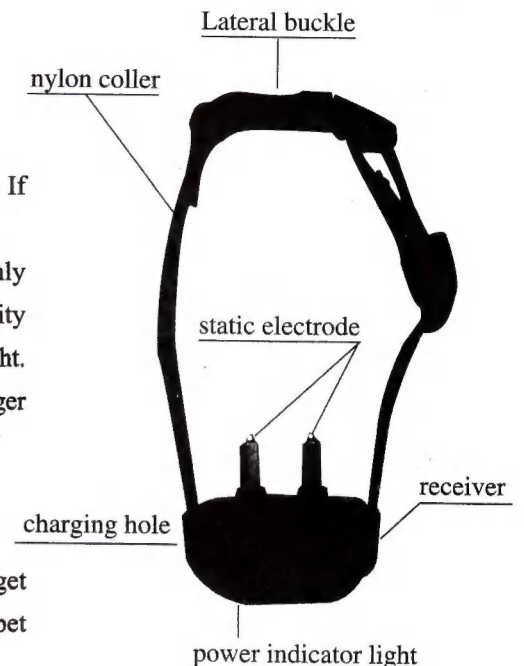

5 There is a vibration sensor switch in the receiver, you just need to put it alone, then the power of it will be turned off automatically.

C How to charge the batteries:

- 1 The lithium batteries installed in the remote controller and the receiver can be recharged. Please use the charger the product offers to charge it.
- 2 The display screen of the remote controller can show the electricity of the battery. If the electricity of the battery is not enough, then you should charge it at once.
- 3 After the receiver is turned on, it is in a standby state. In the standby state, it only consumes small amount of electricity. A frequent use of it will consume electricity quickly. Therefore you should often check the batteries by watching the indicator light. When the electricity of the batteries is not enough, please use the appropriate charger to charge the batteries..

D Cautions:

- 1 At first wearing this collar, some pets will feel uneasy. Give the pet some time to get used to it. Don't use the ⚡ function of this product until you are sure that the pet has gotten used to it.
- 2 Digital audio transmitting technology is applied in the remote controller. Remote control signals can penetrate obstacles. It is unnecessary for the remote controller to point directly at the receiver. However, obstacles will affect the valid distance of remote controlling.
3. The valid distance of remote controlling means the straight-line distance between the remote controller and the receiver without obstacles in between. If there are interference signals or signal screening around, the actual remote control distance may be shorten.
- 4 The product is used for training the pets. You should be patient when training the pets. Good effect can only be achieved by lasting use of it.
- 5 The [] and ⚡ of the receiver is used to curb the improper deeds of the pets. Please be advised that don't use them to make fun of the pet.
- 6 Presently, this product is the most humane tool for pet training. Following the correct operational instructions, you can effectively train the pet and bring it no harm.
- 7 Though the receiver is waterproof, you cannot immerse it into the water for a long time.

E-613/623 Remote Control Training Collar User 's Manual

Thank you for choosing our product!

Please read this manual carefully before using the product.

Please do read the Cautions, for fear that unwanted results arise from improper operation.

The product can control one or two receivers at the same time.

A Preparation before using:

1 The lithium batteries installed in the remote controller and the receiver can be recharged. Before using the product, check that whether the electricity of the battery is enough or not. The display screen of the remote controller can show the electricity of the battery. If the indicator light of the receiver doesn't light or goes dim, it means that the electricity of the battery is not enough ,then you should use the appropriate charger to charge it.

Press the  button on the left of the remote controller for about two seconds, the screen will light, repeat it again can turn off the power.

2 The remote controller has a power-saving feature, when you don't operate it in a long time, the display screen will be turned off automatically. It will be turned on again by pressing the  button.

3 When the remote controller is in a standby state, press the button shortly can choose the target (A or B or A+B) , when the remote controller just control one receiver, you don't need to choose it.

4 The display screen of the remote controller can display the functions and the MENU.

5 When the display screen is light, continue to press the  button can enter the MENU, and it will exit the MENU by repeating it again.

6 After entering the MENU, press  button shortly can choose the function you want. When the function symbol is flashing, press the  button can increase or decrease the degree of the function.

7 After having set all the functions , press the  button continuously, you may exit the MENU.

8 Press the  button, the remote controller will make the " B-B " sound.

9 The receiver has a power-saving feature, the power will be turned off automatically without receiving orders in a long time or in a long rest .

10 When the receiver vibrates , the power indicator light installed in the receiver will light . If it doesn't light or goes dim, it means that the electricity of the battery is not enough , then you should use the appropriate charger to charge it.

11 Checking the receiver: Respectively press the   and  buttons on the remote controller and the receiver will release corresponding " B-B " sound, vibration or shock.

12 When testing the shock function of the receiver, you will hear a " pa-pa " sound from the receiver. When the testing bulb is connected with the poles, it will light. The stronger of the shock, the faster of the flashing.

13 The  or  of the collar is to curb the improper deeds of the pet. After each successful check, you should let the pet know what should be done and what should not be done. After a number of trainings, the pet will understand what you like and don't like.

14 Adjust the length of the collar to fit the neck of the pet. The proper tightness should be that you can insert a finger in between.

15 Prepare some socks for the dog as rewards for good deeds. This will make better effect in the training.

B Operational instructions:

1 Open the insert buckle of the collar and put the collar round the neck of the pet. Adjust the tightness of collar that you can insert a finger in between.

2 Most pets feel uncomfortable at first wearing the collar. Don't use the  function at that time until you are sure that the pet has gotten used to the collar. The  is used to curb the improper deeds of the pet. Don't use it casually or to make fun of the pet.

3 You can call your dog soundlessly by "  " in a long distance, or you can use the " B-B " sound.
